

PRESS RELEASE: PARIS July 19, 2010: BMSystems & Pherecydes-Pharma publish a validated systems biology industrial success, in a reference US biodefense journal. These disruptive scientific innovations in the fields of biodefense and biosecurity (protection against multi-resistance bacterial infections) are protected by 3 patents.

For more information:

- [Download the publication](#): Genetically Engineered Virulent Phage Banks in the Detection and Control of Emergent Pathogenic Bacteria published in Biosecurity and Bioterrorism: Biodefense Strategy, Practice, and Science publication.

Three opportunities to meet our team in a near future:

- [Molecular Microbiology Conference](#) organized by *CNRS with the support of INRA, INSERM and Institute Pasteur*: Dr. François Iris, CSO, is invited to present BMSystems' expertise and achievements in the field of bacteria/phages interactions: Presqu'île de Giens France: October 11-15, 2010.
- *In the United States*, to learn more about possible business collaborations with Pherecydes-Pharma, and about BMSystems' developments in the fields of *neurodegenerative diseases, psychiatric disorders and multiple sclerosis*.
 1. [French Biotech Tour](#) in Philadelphia: September 14, 2010, where US Pharma/Biotech companies are invited to meet selected French biotech companies focused in CNS, Autoimmunity and Inflammation.
 2. [BioPharm America partnering](#) in Boston: September 15-17, 2010.

BIO-MODELING SYSTEMS is the first and, to date, the only life sciences research-based Company that succeeded to create and to experimentally validate heuristic in-silico models that led to disruptive discoveries, generating patented new knowledge and attractive new businesses launches.

For sustainable business, time to market is a critical issue. Bio-Modeling Systems, a world leading R&D booster for life sciences discoveries, can surely help you save considerable time and resources immediately.

Very sincerely,

Manuel Gea,
Co-founder & CEO
BIO-MODELING SYSTEMS Predictive Integrative Biology
